

IMPROVEMENTS ARE ON AT UNIVERSITY

GREAT CHANGES BEING MADE IN
THE GROUNDS DAILY.

The Law Department Will Prove a
Great Drawing Factor for Advancing the School.

(By H. L. Thompson.)

Considerable work is now being done on the University campus and buildings. Contractors have been busy for some time at work on the interior of Buckman Hall and a good sized force of hands is now engaged in beautifying the grounds by cleaning the existing drives and in developing new ones that will run around to the new buildings soon to be erected.

The east gate has been locked since the early part of the summer because droves of cattle are permitted to roam about that part of the city and owing to visitors leaving the gates open the cattle were continually going in and destroying flowers and shrubbery. Gates which will open and shut automatically will be placed on the new drives and will replace those now used, so that the University grounds will be rendered more easily accessible to visitors—a new drive in the form of a reverse curve similar to the one now in use but passing in front of Science Hall and the Experiment Station building, the buildings to be erected at an early date. The drives will all be laid soon according to the design of the architect.

The Law School promises to be a prosperous addition to the University's work in the State. Senator H. H. Buckman says of it: "I think that this is a good step in the right direction and shall be glad to do anything I can to assist same." Dean Farrah, who arrived in the city Saturday, is in charge of the work. For nine years he was dean of the Law Department of Stetson University. Professor Farrah is an A. M. and LL. B. from the University of Michigan, and was Professor of Law in the Department of Law of that great Northwestern University before coming to Florida. He is to be assisted by Professor Trusler, who is an honor graduate in law from the University of Michigan, and who has been associated with Dean Farrah for one year in his work at DeLand. He came to Florida from the University of Oklahoma. These able men, together with such distinguished lawyers as Col. W. W. Hampton and Judge Horatio Davis, will make up the strongest law faculty in the State, if not in the entire South.

Dean Farrah has closed contracts with law-book publishers for a law library to consist of upward of 3,600 volumes. According to the Dean this library will be vastly superior to the one he has been accustomed to at Stetson University, and will be one of the best, if not the best, in the State, excepting only the Supreme Court library.

The interior of Buckman Hall is being thoroughly renovated. When the work now going on is finished, it will be one of the most comfortable and commodious dormitories in the South. The walls are being decorated in green and cream and the wood work stained in dark oak. Bath rooms have been put on every floor and they are to be supplied with hot and cold water in every section.

It appears that the many improvements and additions made at the State University this summer have combined to arouse keen interest in and give a new impetus to this educational enterprise. While the old students have not made many reservations this early in the season, as it is their custom to call for reservations in September, yet a considerable number of new students have been assigned to quarters in Buckman Hall. Not intending any invidious comparison, but merely as a point of interest, it might be mentioned that to date 62 students have been assigned rooms in Buckman Hall for next year, as against 67 students in actual attendance upon the institution at the close of school last May.

The University and its grounds are always open to the public, and visitors are cordially welcome at all times.

For any pain, from top to toe, from any cause, apply Dr. Thomas' Electric Oil. Pain can't stay where it is used.

CHILD'S DREADFUL SKIN TROUBLES

Had Sixty Boils when but Six Months Old—Was Annually Attacked by a Humor—It Looked Red Like a Scald and Spread Over Half Her Head—Both Troubles are Cured.

NO PRAISE TOO HIGH FOR THE CUTICURA REMEDIES

"When my little Vivian was about six months old, her papa had a boil on his forehead. At that time the child was covered with prickly heat and I suppose in scratching it, her own head became infected for it broke out in boils, one after another. She had about sixty in all and I used Cuticura Soap and Cuticura Ointment which cured her of them entirely. Then, sometime later, her little foot got sore between the toes. Being afraid it was salt rheum, I spoke to our doctor. He gave me a powder which dried it up, but soon after it broke out behind her ears. They cracked half way around and the humor spread up on to her head until, on several occasions, it was nearly half covered. The humor looked like a scald, very red with a sticky, clear fluid coming from it. This occurred every year. I think it was toward the spring. I always bathed it with warm water and Cuticura Soap and applied Cuticura Ointment which never failed to heal it up. The last time it broke out was when she was six years old. It became so bad that I was discouraged. Then I procured a bottle of Cuticura Resolvent which soon cleared it out of her blood. I continued the use of Cuticura Soap and Ointment with the Resolvent until she was perfectly well. She is now about eight years old and has never been troubled in the last two years. We also find Cuticura Resolvent a good spring medicine and we are just giving the children Cuticura Resolvent Pills as a tonic. We do not think any one can praise Cuticura Remedies too highly. Mrs. M. A. Schwerin, 674 Spring Wells Ave., Detroit, Mich., Feb. 24, 1908."

Complete External and Internal Treatment for Every Humor of Infants, Children and Adults consists of Cuticura Soap (25c.) to Cleanse the Skin, Cuticura Ointment (50c.) to Heal the Skin and Cuticura Resolvent (25c.), or in the form of Chocolate Coated Pills, 25c. per trial of 60; to Purify the Blood. Sold throughout the world. Potter Drug & Chem. Corp., Sole Props., Boston, Mass.

LIGHTNING PRANKS ON SUNDAY EVENING

GOES INTO TENT MEETING AT
NEWBERRY BEFORE SERVICE.

Both Preachers and the Wife of One
Were Stunned for Number
of Hours.

A thunder and lightning storm at Newberry on Sunday evening played pranks with the tent which was erected for the purpose of holding religious meetings.

Late in the afternoon the storm came up, and as the tent was erected in a sapling thicket, one of the saplings was struck with lightning which ran into the tent and stunned all of the members, consisting of the two preachers, Revs. Coone and Willis, besides the wife and child of one of them.

They are known as Wesleyan Methodists and were assembled there for the purpose of holding religious tent meetings, but the episode will probably change their plans for the present, at least.

The heel on the shoe of Rev. Willis was knocked off, while all of the members suffered from the jar and were dazed for a number of hours, none of them fully recovering until Monday morning.

Baby Morphine Fiends

Are made by all soothing syrups and baby medicines that contain opium and narcotics. McGee's Baby Elixir contains no injurious or narcotic drugs of any kind. A sure and safe cure for disordered stomachs, bowels and fretfulness—splendid for teething infants. Sold by W. M. Johnson.

Sent to Asylum.

From Tuesday's Daily Sun:
Pearl Davis, the young white girl brought here from Archer, was adjudged insane and has been sent to the State Asylum at Chattahoochee.

People with chronic bronchitis, asthma and lung trouble, will find great relief and comfort in Foley's Honey and Tar, and can avoid suffering by commencing to take it at once. J. W. McCollum & Co.

The Sun office for calling cards.

BROWNING KILLED BY BEING THROWN

MUST HAVE SUFFERED SOME INTERNAL INJURY.

Was In the Act of Driving Beef in
Slaughter House Near Trenton
at the Time of Accident.

From Tuesday's Daily Sun:

M. T. Browning, a well-known and prominent citizen of Trenton, was killed at that place on Saturday by being thrown from his horse which had come in contact with a mad cow, which he was penning for the purpose of butchering.

Mr. Browning was engaged by J. A. Durrance to do his butchering, and as was his custom, went out to the slaughter house early Saturday morning, about 4 o'clock, to round up his beef, but when nearing the entrance to the butchering pen the cattle became unruly and made a dash for the horse upon which the gentleman was riding, with the result that horse and rider were thrown to the ground.

The shoulder and back of his head showed signs of having been bruised, although he must have suffered some internal injury, for he never regained consciousness and died Saturday evening about 5 o'clock. Both Drs. Clyatt and Williams were summoned and did everything possible for the wounded man, who was taken to Trenton immediately after being injured.

His death is deeply regretted by the citizens of that section, for Mr. Browning leaves a large family, consisting of a wife, four daughters and two sons, the children all being nearly grown.

BRICK ARE BEING PLACED

Next Week Will Witness the First
Bricklaying on Building.

From Tuesday's Daily Sun:

Superintendent Miles of the Government building stated that they would commence the laying of brick on the building by next week.

The first of the shipment has already arrived and he is looking for them to come in at the rate of a carload a day until the order has been completed. He states that a number of bricklayers have been engaged and they will commence to arrive by the first of the week.

The forge and other tools having arrived a large force is now engaged in placing all of the riveted bolts in position, and the manner in which they are pitched about is quite a novelty for this section.

The force of experienced workers is gradually increasing at the building and it will be only a short while before all of the cheap labor will be dispensed with, and nothing but experienced men placed to do the work.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition hearing will be destroyed forever. Nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. CHENEY & CO., Toledo, O.

Sold by druggists, 75c.
Take Hall's Family Pills for constipation.

Will Build Home.

Ed Weston has purchased from Judge J. A. Carlisle a handsome building lot near the property of the Judge and will within a short while erect a neat five-room cottage on the place.

For indigestion and all stomach trouble take Foley's Orino Laxative, as it stimulates the stomach and liver and regulates the bowels and will positively cure habitual constipation. J. W. McCollum & Co.
